

Datadog for Government Achieves 'In Process' Authorization for GovRAMP High

August 20, 2025 at 4:05 PM EDT

NEW YORK -- [Datadog](#), Inc. (NASDAQ: DDOG), the monitoring and security platform for cloud applications, announced that it is now 'In Process' for GovRAMP High Authorization. This designation reinforces Datadog for Government's commitment to delivering secure, scalable observability for the public sector—supporting the stringent cybersecurity requirements of state and local government agencies and educational institutions.

Building on its existing [FedRAMP@ Moderate authorization](#) and ['In Process' status for FedRAMP High](#), the GovRAMP High 'In Process' status signifies that Datadog for Government is actively working toward authorization to support mission-critical workloads and sensitive data in regulated environments. This milestone allows state, local and education (SLED) IT teams—and their vendor partners—to accelerate digital transformation with greater confidence and security.

“This status reflects our continued investment in helping the public sector strengthen operational resilience and improve cost-efficiency,” said Ryan Gault, Regional Director, SLED East at Datadog. “Observability is foundational to delivering secure, high-performing digital services. With Datadog for Government now 'In Process' for GovRAMP High, we're enabling agencies to gain end-to-end visibility, reduce downtime and make smarter use of their IT resources.”

[GovRAMP](#) provides a standardized security framework that enables public sector organizations to evaluate cloud services against [NIST 800-53 Rev 5 controls](#). High-impact authorization ensures that platforms like Datadog for Government can serve SLED agencies with enhanced security, continuous monitoring and simplified procurement through trusted, third-party audits.

Modern SLED organizations are navigating hybrid, multi-cloud and edge environments while striving to improve public service delivery. Datadog for Government helps agencies:

- Detect and resolve performance issues before they disrupt public- and-student facing systems;
- Strengthen security posture with continuous threat detection and compliance monitoring;
- Optimize cloud and on-prem resources to reduce operational costs;
- Use real-time analytics to enhance digital service delivery and citizen engagement.

About Datadog

Datadog is the observability and security platform for cloud applications. Our SaaS platform integrates and automates infrastructure monitoring, application performance monitoring, log management, user experience monitoring, cloud security and many other capabilities to provide unified, real-time observability and security for our customers' entire technology stack. Datadog is used by organizations of all sizes and across a wide range of industries to enable digital transformation and cloud migration, drive collaboration among development, operations, security and business teams, accelerate time to market for applications, reduce time to problem resolution, secure applications and infrastructure, understand user behavior and track key business metrics.

Forward-Looking Statements

This press release may include certain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended including statements on the benefits of new products and features. These forward-looking statements reflect our current views about our plans, intentions, expectations, strategies and prospects, which are based on the information currently available to us and on assumptions we have made. Actual results may differ materially from those described in the forward-looking statements and are subject to a variety of assumptions, uncertainties, risks and factors that are beyond our control, including those risks detailed under the caption “Risk Factors” and elsewhere in our Securities and Exchange Commission filings and reports, including the Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission on August 8, 2025, as well as future filings and reports by us. Except as required by law, we undertake no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, changes in expectations or otherwise.
