## Datadog Provides HIPAA Compliant Log Management

May 30, 2019 at 10:00 AM EDT

NEW YORK--([BUSINESS WIRE](#))--Datadog, the leading monitoring and analytics platform for modern cloud environments, today announced that its Log Management service has met requirements for the Health Insurance Portability and Accountability Act (HIPAA).

With this announcement, Datadog's healthcare customers, and their business associates subject to HIPAA, can use the Datadog Log Management service for applications that process, maintain, and store protected health information.

"Achieving HIPAA compliance is a part of our ongoing commitment to applying high standards for privacy and security for all our customers, including those in highly regulated industries," said Andrew Becherer, Chief Security Officer at Datadog. "Protecting individuals' health information is a serious responsibility, and we look forward to helping healthcare customers build and maintain their technology while meeting that responsibility."

Datadog has also received SOC 2 Type I and Type II certification, and is compliant with GDPR. For more information about Datadog's approach to security, data-protection, and compliance, please visit: <https://www.datadoghq.com/security/>

### About Datadog

Datadog is a monitoring service for hybrid cloud applications, assisting organizations in improving agility, increasing efficiency, and providing end-to-end visibility across the application and organization. These capabilities are provided on a SaaS-based data analytics platform that enables Dev, Ops and other teams to accelerate go-to-market efforts, ensure application uptime, and successfully complete digital transformation initiatives. Since launching in 2010, Datadog has been adopted by more than 7,000 enterprises including companies like Activision, AT&T, Deloitte, DraftKings, Nasdaq, Peloton, The Washington Post, Turner Broadcasting, and Whole Foods.
