

Datadog Announces Third Quarter 2021 Financial Results

November 4, 2021

Third quarter revenue grew 75% year-over-year to \$270 million

Strong growth of larger customers, with 1,800 \$100k+ ARR customers, up from 1,082 a year ago

Announced ten new products and features at Dash

NEW YORK-- Datadog, Inc. (NASDAQ:DDOG), the monitoring and security platform for cloud applications, today announced financial results for its third quarter ended September 30, 2021.

"We are pleased with our third quarter performance, with revenue growth accelerating to 75% year-over-year. We saw broad-based strength across customer segments and products," said Olivier Pomel, co-founder and CEO of Datadog. "Digital transformation and cloud migration continue to be transformational forces for companies of all sizes."

Pomel added, "With ten new products and major features announced at our annual user conference, Dash, we are continuing to innovate at a rapid pace. We are broadening our observability platform, further developing our Cloud Security Platform, and launching the general availability of CI Visibility, which represents a major step towards shift-left observability for developer workflows."

Third Quarter 2021 Financial Highlights:

- Revenue was \$270.5 million, an increase of 75% year-over-year.
- GAAP operating loss was \$(4.9) million; GAAP operating margin was (2)%.
- Non-GAAP operating income was \$44.0 million; non-GAAP operating margin was 16%.
- GAAP net loss per diluted share was \$(0.02); non-GAAP net income per diluted share was \$0.13.
- Operating cash flow was \$67.4 million, with free cash flow of \$57.1 million.
- Cash, cash equivalents, restricted cash, and marketable securities were \$1.5 billion as of September 30, 2021.

Third Quarter & Recent Business Highlights:

- As of September 30, 2021, we had 1,800 customers with ARR of \$100,000 or more, an increase of 66% from 1,082 as of September 30, 2020.
- Announced ten new products and features at our annual user conference, Dash. Product announcements included:
 - The general availability of CI Visibility, to help customers gain visibility into their developer tests and pipelines.
 - The general availability of Session Replay, a new product in our Real User Monitoring suite, through which customers can watch individual user sessions using a video-like interface.
 - The general availability of Funnel Analysis, to track user behavior through conversion funnels.
 - The general availability of Network Device Monitoring, enabling customers to automatically discover and monitor on-premise network devices and appliances.
 - The general availability of Datadog Apps, which allows partners to add new functionality and deeper integrations to the Datadog platform, including new visualizations and custom interactions.
 - The introduction of Online Archives for Log Management, a warehousing solution with long-term archival and online query capabilities.
 - The private beta launch of Cloud Cost Management, to help our customers control costs for their rapidly growing cloud and container environments.
 - Official Datadog support of Vector, an open-source tool that allows users to collect, enrich, and transform observability data, and automatically route it to the destination of their choice.
 - The private beta launch of Observability Pipelines, which will include enterprise-class capability
 for Vector, and the ability for end users to control it remotely using Datadog while running on
 their premises or their cloud accounts.
 - The private beta launch of Universal Service Monitoring, to track performance of all applications and services without requiring custom code or instrumentation.
 - The private beta launch of Application Security, a product within our Cloud Security Platform, to monitor attacks and correlate them with application traces.
- Announced the general availability of Database Monitoring. With insights into query performance and
 explain plans, as well as automatic correlation of query metrics with application and infrastructure
 metrics, Database Monitoring provides engineers and database administrators the visibility they need to
 quickly find and fix application performance issues that arise from slow running database queries.

Fourth Quarter and Full Year 2021 Outlook:

Based on information as of today, November 4, 2021, Datadog is providing the following guidance:

- Fourth Quarter 2021 Outlook:
 - Revenue between \$290 million and \$292 million.
 - Non-GAAP operating income between \$38 million and \$40 million.
 - Non-GAAP net income per share between \$0.11 and \$0.12, assuming approximately 347 million weighted average diluted shares outstanding.

Full Year 2021 Outlook:

- Revenue between \$993 million and \$995 million.
- Non-GAAP operating income between \$133 million and \$135 million.
- Non-GAAP net income per share between \$0.39 and \$0.40, assuming approximately 344 million weighted average diluted shares outstanding.

Datadog has not reconciled its expectations as to non-GAAP operating income, or as to non-GAAP net income per share, to their most directly comparable GAAP measure as a result of uncertainty regarding, and the potential variability of, reconciling items such as stock-based compensation and employer payroll taxes on equity incentive plans. Accordingly, reconciliation is not available without unreasonable effort, although it is important to note that these factors could be material to Datadog's results computed in accordance with GAAP.

Conference Call Details:

- What: Datadog financial results for the third quarter of 2021 and outlook for the fourth quarter and the full year 2021
- When: November 4, 2021 at 5:00 P.M. Eastern Time (2:00 P.M. Pacific Time)
- **Dial in:** To access the call in the U.S., please dial (800) 708-4540, and for international callers, please dial (847) 619-6397. Callers may provide confirmation number 50234632 to access the call more quickly, and are encouraged to dial into the call 10 to 15 minutes prior to the start to prevent any delay in joining.
- Webcast: https://investors.datadoghq.com (live and replay)
- Replay: A replay of the call will be archived on the investor relations website

About Datadog

Datadog is the monitoring and security platform for cloud applications. Our SaaS platform integrates and automates infrastructure monitoring, application performance monitoring and log management to provide

unified, real-time observability of our customers' entire technology stack. Datadog is used by organizations of all sizes and across a wide range of industries to enable digital transformation and cloud migration, drive collaboration among development, operations, security and business teams, accelerate time to market for applications, reduce time to problem resolution, secure applications and infrastructure, understand user behavior and track key business metrics.

Forward-Looking Statements

This press release and the earnings call referencing this press release contain "forward-looking" statements, as that term is defined under the federal securities laws, including but not limited to statements regarding Datadog's strategy, partnerships, investments and long-term opportunity, and Datadog's future financial performance, including its outlook for the fourth quarter and full year 2021. These forward-looking statements are based on Datadog's current assumptions, expectations and beliefs and are subject to substantial risks, uncertainties, assumptions and changes in circumstances that may cause Datadog's actual results, performance or achievements to differ materially from those expressed or implied in any forward-looking statement.

The risks and uncertainties referred to above include, but are not limited to (1) our recent rapid growth may not be indicative of our future growth; (2) our history of operating losses; (3) our limited operating history; (4) our business depends on our existing customers purchasing additional subscriptions and products from us and renewing their subscriptions; (5) our ability to attract new customers; (6) our ability to effectively develop and expand our sales and marketing capabilities; (7) risk of a security breach; (8) risk of interruptions or performance problems associated with our products and platform capabilities; (9) our ability to adapt and respond to rapidly changing technology or customer needs; (10) the competitive markets in which we participate; (11) risks associated with successfully managing our growth; (12) general market, political, economic, and business conditions; and (13) the impact that the ongoing COVID-19 pandemic and any related economic downturn could have on our or our customers' businesses, financial condition and results of operations. These risks and uncertainties are more fully described in our filings with the Securities and Exchange Commission (SEC), including in the section entitled "Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2021, filed with the SEC on August 6, 2021. Additional information will be made available in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2021 and other filings and reports that we may file from time to time with the SEC. Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, we cannot quarantee future results, levels of activity, performance, achievements, or events and circumstances reflected in the forward-looking statements will occur. Forward-looking statements represent our beliefs and

assumptions only as of the date of this press release. We disclaim any obligation to update forward-looking statements.

About Non-GAAP Financial Measures

Datadog discloses the following non-GAAP financial measures in this release and the earnings call referencing this press release: non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses (sales and marketing, research and development, general and administrative), non-GAAP operating income (loss), non-GAAP operating margin, non-GAAP net income (loss), non-GAAP net income (loss) per diluted share, non-GAAP net income (loss) per basic share, and free cash flow. Datadog uses each of these non-GAAP financial measures internally to understand and compare operating results across accounting periods, for internal budgeting and forecasting purposes, for short- and long-term operating plans, and to evaluate Datadog's financial performance. Datadog believes they are useful to investors, as a supplement to GAAP measures, in evaluating its operational performance, as further discussed below. Datadog's non-GAAP financial measures may not provide information that is directly comparable to that provided by other companies in its industry, as other companies in its industry may calculate non-GAAP financial results differently, particularly related to non-recurring and unusual items. In addition, there are limitations in using non-GAAP financial measures because the non-GAAP financial measures are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies and exclude expenses that may have a material impact on Datadog's reported financial results.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. A reconciliation of the historical non-GAAP financial measures to their most directly comparable GAAP measures has been provided in the financial statement tables included below in this press release.

Datadog defines non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses (sales and marketing, research and development, general and administrative), non-GAAP operating income (loss), non-GAAP operating margin and non-GAAP net income (loss) as the respective GAAP balances, adjusted for, as applicable: (1) stock-based compensation expense; (2) the amortization of acquired intangibles; (3) non-cash benefit related to tax adjustment; (4) employer payroll taxes on employee stock transactions; and (5) amortization of issuance costs. Datadog defines free cash flow as net cash provided by operating activities, minus capital expenditures and minus capitalized software development costs. Investors are encouraged to review the reconciliation of these historical non-GAAP financial measures to their most directly comparable GAAP financial measures.

Management believes these non-GAAP financial measures are useful to investors and others in assessing Datadog's operating performance due to the following factors:

Stock-based compensation. Datadog utilizes stock-based compensation to attract and retain employees. It is principally aimed at aligning their interests with those of its stockholders and at long-term retention, rather than to address operational performance for any particular period. As a result, stock-based compensation expenses vary for reasons that are generally unrelated to financial and operational performance in any particular period.

Amortization of acquired intangibles. Datadog views amortization of acquired intangible assets as items arising from pre-acquisition activities determined at the time of an acquisition. While these intangible assets are evaluated for impairment regularly, amortization of the cost of acquired intangibles is an expense that is not typically affected by operations during any particular period.

Non-cash benefit related to tax adjustment. Datadog recorded a contingent payroll tax liability in conjunction with a common stock repurchase transaction in 2016. In 2020, the period of limitations for assessing the contingent Federal payroll tax liability expired and the Company was legally released from being the primary obligor, and recognized a benefit in the consolidated statement of operations. Datadog does not believe this is reflective of on-going results and therefore adjusted for this benefit.

Employer payroll taxes on employee stock transactions. Datadog excludes employer payroll tax expense on equity incentive plans as these expenses are tied to the exercise or vesting of underlying equity awards and the price of Datadog's common stock at the time of vesting or exercise. As a result, these taxes may vary in any particular period independent of the financial and operating performance of Datadog's business.

Amortization of issuance costs. In May 2020, Datadog issued \$747.5M of convertible senior notes due 2025, which bear interest at an annual fixed rate of 0.125%. Debt issuance costs, which reduce the carrying value of the convertible debt instrument, are amortized as interest expense over the term. The expense for the amortization of debt issuance costs is a non-cash item, and we believe the exclusion of this interest expense will provide for a more useful comparison of our operational performance in different periods.

Additionally, Datadog's management believes that the non-GAAP financial measure free cash flow is meaningful to investors because management reviews cash flows generated from operations after taking into consideration capital expenditures and the capitalization of software development costs due to the fact that these expenditures are considered to be a necessary component of ongoing operations.

Operating Metrics

Datadog's number of customers with ARR of \$100,000 or more and number of customers with ARR of \$1 million or more are based on the ARR of each customer, as of the last month of the quarter.

We define the number of customers as the number of accounts with a unique account identifier for which we have an active subscription in the period indicated. A single organization with multiple divisions, segments or subsidiaries is generally counted as a single customer. However, in some cases where they have separate billing terms, we may count separate divisions, segments or subsidiaries as multiple customers.

We define ARR as the annualized revenue run-rate of subscription agreements from all customers at a point in time. We calculate ARR by taking the monthly recurring revenue, or MRR, and multiplying it by 12. MRR for each month is calculated by aggregating, for all customers during that month, monthly revenue from committed contractual amounts, additional usage, usage from subscriptions for a committed contractual amount of usage that is delivered as used, and monthly subscriptions. We updated the definition of MRR as of the quarter ended September 30, 2021 to capture usage from subscriptions with committed contractual amounts and applied this change retroactively. ARR and MRR should be viewed independently of revenue as they are operating metrics and are not intended to be replacements or forecasts of revenue.
